#### **DETAILED ACTION**

### **Drawings**

1. The drawings are objected to because they do not have proper cross-section hatching according to MPEP section 608.02. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of

any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

## Claim Rejections - 35 USC § 112

- The following is a quotation of the second paragraph of 35 U.S.C. 112:
   The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
- 2. Claims 1-3 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1, lines 6 and 9, "at least four conductors" and "two galvanically insulated conductors" are unclear to how these conductors relate to conductors recited earlier in line 3 of the claim.

Claim 1, lines 7-8, the recitation of "at least one of said conductors being galvanically insulated from at least one of the other conductors" is unclear and causes confusion.

Claim 1, line 1, "the conductors" is unclear as to which conductors recited in claim 1 being referred to.

Claim 2, line 2, the recitation of "a double single phase (quad)" is unclear and parenthesis should not be used in the claims.

Art Unit: 2831

Claim 3, line 1, "the conductors" is unclear as to which conductors recited in claim 1 being referred to.

Claim 3, line 2, "a single conductor" is unclear to how this conductor relates to conductors already recited in claim 1.

### Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 4. Claims 1-3, as best understood, are rejected under 35 U.S.C. 102(b) as being anticipated by Hassel (5,444,184).

Hassel discloses an integrated communication and power system, comprising at least one first transformer located on shore, at least one second transformer located offshore (see abstract), conductors (Figures 4-5) connecting the first transformer with the second transformer, said conductors conducting electric power and communication signals, characterized in at least four conductors of which at least three conduct electric power, at least one of said conductors being galvanically insulated from at least one of the other conductors, the communication

Art Unit: 2831

signals being conducted in two galvanically insulated conductors (re claim 1).

Hassel also discloses the conductors forming at least two pairs in a double single phase (quad) arrangement (re claim 2) and the conductors forming a three phase arrangement plus a single conductor (re claim 3).

#### Communication

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Chau N. Nguyen whose telephone number is 571-272-1980. The examiner can normally be reached on Mon-Fri.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Dean Reichard can be reached on 571-272-2800 ext 31. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
